

Northcott COVID-19 Response

Deep Clean (SI:04)

About

This fact sheet contains information relating to cleaning services that can be provided if there is a confirmed COVID-19 case at a Northcott site.

Where does this apply?

- All Northcott sites

Who does this apply to?

- All staff

What Will It Involve?

1. All touch points surfaces are wiped twice using detergent
2. Floors will be mopped with disinfectant. Carpets and rugs will be steamed and disinfected.
3. Disinfectants are applied and left to cure for 10 minutes.
4. The room will undergo 'fogging' where a mist of antiviral disinfectant is sprayed across all surfaces and left to dry for 15-20 minutes.

This will last from 4-6 hours with 2 cleaners.

What Chemicals Are Used?

Hospital grade disinfectants which are approved by the NSW Environmental Protection Authority will be used.

How quickly can this be organised?

Companies will typically be able to deploy cleaning staff on the same day, within 3-6 hours.

Can people remain on site?

Residents/staff can remain on site, in a separate area during a deep clean.

Everyone must maintain social distancing (1.5m spacing) from each other and the cleaning staff.

When fogging occurs, people must wait outside for up to 20 minutes until the mist dries.
