

This Seizure Activity Observation Tool should be used when staff have been asked to document information about a person’s epilepsy and/or seizure activity by their General Practitioner, Neurologist or specialist and has been designed to record information about each seizure observed.

The tool should also be used where a person is new to Life Without Barriers and their seizure pattern and impact are unknown and need to be assessed.

The completed Observation Tool must be provided to the person’s doctor for review.

<b>Name:</b>		<b>CIRTS:</b>	
<b>Address:</b>		<b>Date:</b>	

Seizure period			
<b>Time seizure started: (24 hr time)</b>		<b>Time seizure finished: (24 hr time)</b>	

Before the seizure started:	
<b>Was there any change in the person’s mood or behaviour?</b>	<input type="checkbox"/> No <input type="checkbox"/> Yes → (if Yes, describe below)
